SageStorm offers software development services like no other:

BLEEDING EDGE SKILLS + LOW OVERHEAD = A PROJECT YOU CAN AFFORD

Boise is home to HP and Micron, and as such has become a high-tech development hot-spot. A blend of extreme know-how and low cost of living (over major metropolitan areas) results in the perfect recipe for top-tier affordable software development.

We provide the following development expertise

- Identifying, understanding, and resolving tough defects and solving tough problems

- Native mobile application development for iOS, Android, and Windows 10 - both tablet and phone platforms

- Non-native to native cross-platform desktop, mobile phone application development, targeting Xamarin, progressive webapp technologies (Cordova and other webviews), or JavaScript based frameworks

- In-house or Internet accessible custom software tools - go "serverless" microservices using AWS Lambda or Azure Functions - we can integrate with cloud based database systems

- Webapp development using tiered stack such as .NET, Windows platform specific or not, or a full stack JavaScript solution

- Know or can get up to speed on the JavaScript framework flavor of the month. We definitely know jQuery, Angular 1 and 5 and Node.js/Express and vanilla JavaScript

- Advanced technology such as Augmented Reality, Geographic Information System (GIS), E-commerce...

- Embedded systems development targeting Linux, macOS, or Windows 10 using Java, C, C++, Google Go, Python, and acquired knowledge of Ruby on Rails, RSpec

- Leverage third party web APIs, e.g., Twitter, Facebook, Google, LinkedIn, etc.

- UI/UX Design, graphic design (access to great talent), QA/Automated Testing

We also provide and manage full production services

- Script writing

- Video recording

- Motion graphics development

- Video/audio application integration and deployment to website/webapp

What now

We need to understand your problem! Tell us what you need, so we know where to start. From your detailed customer requirements, we outline the steps, processes, cost, and project releases.

Need to know

If SageStorm doesn't know a required technology or type of development work, we'll be up to speed in nano seconds or find an expert who can deliver. SageStorm will never outsource to Asia or South America, guaranteed. SageStorm reserves the right to occasionally subcontract out to experts in the Boise area and only in the Boise area so that the project can be properly managed to get it done right the first time and on time.

You should know

We prefer projects that require at least one part-time developer for a period of 3 months. We love long-term contracts and ongoing relationships to reduce job churn and disruption to the client.

We like to work with our clients as a Corp-to-Corp (C2C) relationship and therefore like to work in our own office using our own tools but are willing to work some at the client's site; this, of course, is negotiable and we/I will consider full-time W-2 positions. We are very willing to travel and stay on the client's site periodically as required by client. SageStorm pays for food and lodging leaving only the expense of flights and car rental for the client; however, this is negotiable.

The client is only charged for actual hourly work (hourly rate will vary based on the particular service or development complexity). SageStorm invoices the client every two weeks to match its own payroll requirements.
